第一关全部视频生成提示词

用于外部 AI 制作的完整分段文本与参考图说明

本文件按 2026 年 10 月 30 日当前工作区的新开局代码整理。固定通讯采用 10 月 28 日确认的 R28 版本：8 个主线节点、4 个补充节点、3 个条件变体，共 15 个条目，按现有播放器切成 41 段，每段请求 10 秒。每段都给出可独立复制的完整提示词。

另附玩家摄影的动态模板。它们不是额外添加的固定剧情视频，也不能替代游戏中的真实取景、实体操作和证据核验。旧存档的 L1 E 系列及第二章任务不混入本包。

如何直接使用

1 先在外部工具上传同目录的“艾里亚斯角色参考图.png”，选择角色参考或参考图模式，不把角色设定图强制设成首帧或尾帧。

2 按总表选条目，找到对应分段页，复制“完整提示词”下面的全部英文和中文对白。编号、触发说明、文件名不属于提示词。配套 TXT 中的 BEGIN PROMPT 与 END PROMPT 之间是完全相同的文本。

3 固定通讯每段设 10 秒；16 比 9 是外部制作建议，不是代码硬性参数。不要把数十秒全文挤进一段 10 秒视频。

4 同一条目的片段按 P01、P02 等顺序拼接，保持同一音色、装备、背景、机位和伤情。条件版本只选与实际状态相符的一版。

5 检查坐标和中文对白没有被漏念、改写或画成文字。若所用工具不生成声音，把该段 SPEECH 中的原文用于单独配音。

现有参考图是角色设定图而非真实房间布景。不得把白背景、文字标签、多视图或未戴头盔的设定图视图抄进影片；本包不伪造一张已经存在的调度室参考图。

交付边界

本次仅整理提示词与参考素材，未提交外部生成、未花费视频额度、未修改游戏代码。41 段含互斥版本，不代表一次通关必须播放 410 秒；请求时长也不等于已生成媒体的实际时长。外部影片接回游戏、角色和场景连续性、语音质量仍需另行验收。

固定通讯总表

编号	视频内容	类别	分段	总请求时长
V01	求救呼叫	主线	2	20 秒
V02	终于有人回应	主线	3	30 秒
V02A	被困经过	补充节点	4	40 秒
V03	立即关闭主动声纳	主线	1	10 秒
V03-QUIET	立即关闭主动声纳	条件变体	1	10 秒
V03A	声纳与未知生物	补充节点	4	40 秒
V04	先修艇	主线	3	30 秒
V04R	维修催促	补充节点	2	20 秒
V04R-STORED	维修催促	条件变体	2	20 秒
V05	货舱诱导计划	主线	3	30 秒
V06	留下一份调查证据	主线	2	20 秒
V07	询问隔离结果	主线	1	10 秒
V07R	受伤与重新诱导	补充节点	3	30 秒
V08	分头下行	主线	5	50 秒
V08-INJURED	分头下行	条件变体	5	50 秒

总计 15 个条目，41 段 10 秒通讯。V03 与 V03 QUIET、V04R 与 V04R STORED、V08 与 V08 INJURED 分别是互斥版本。

人物与空间保持一致

人物是一名艾里亚斯：磨损的黄色潜水头盔，不透明深色面罩，黑色干式潜水服，棕褐色背带。头盔保持密闭，不露面孔，不出现身体或袖口异常。不要把宇航员式自拍构图误做成太空服、外太空或失重。

V01 至 V07R 均在干燥的港口总调度室内，身后为关闭的人员门；V08 两种版本改为总调度室旁的干燥安全人员通道。地面干燥、有可呼吸空气、正常重力；人物周围不加水下悬浮物或气泡。

通讯采用臂长自拍，画面包含头盔与上身，一只戴手套的前臂出现在下角。允许克制的自然手持轻摆，不切镜、不环绕、不变焦。玩家水下证据片则全程固定机位，两类规则不能混用。

完整提示词

Use the attached Elias task image as the character, equipment and location reference. Reframe it as his arm-length selfie as instructed; preserve task evidence and the dry or flooded state. Do not copy its external observer viewpoint. Do not reproduce the reference sheet as an opening or ending frame. ELIAS SELFIE CAMERA: One continuous first-person self-recorded mission message, like an astronaut holding a camera at arm length and looking back into its lens. Elias is the person filming, not a third-person cameraman.

Wide-angle helmet-and-torso close-up, gloved forearm at a lower corner; task evidence beside him, doorway over his shoulder.

Restrained natural hand sway only. He may make a small deliberate wrist turn to show the stated task evidence, then return to himself. No cuts, orbit, cinematic tracking, zoom or external reverse shot.

Same reference diving helmet, dark visor, dry suit and harness. Astronaut-like framing only; no spacesuit, outer space or zero gravity.

Preserve the referenced task location and its current dry or flooded state. Do not add people, reveal hidden information, or change the authored action or outcome.

REFERENCE: Attached image is the Elias character design sheet, not the opening composition. Use exactly one helmeted Elias; discard sheet layout, labels, white background and all unhelmeted views.

IDENTITY: Worn yellow diving helmet, opaque dark visor, black diving drysuit, tan harness. Helmet stays sealed; no visible face or body anomaly.

LOCATION: a dry harbor central dispatch room, closed personnel door behind him. Dry floor, breathable air, normal gravity; no underwater particles or bubbles around Elias.

ACTION: He speaks urgently into his helmet camera, listening between sentences. Remain in the present; no flashback. No injury unless explicitly described in ACTION.

SPEECH: Speak this Mandarin message naturally, without omitting or paraphrasing any words: 坐标 X11、Y16，深度 1012 米，收到请回复。坐标 X11、Y16，

MESSAGE: No subtitles or text generated in the picture; the game displays the exact task and coordinates separately.

No other characters, creature, hidden identity reveal, space setting or cinematic cut.

对白核对 坐标 X11、Y16，深度 1012 米，收到请回复。坐标 X11、Y16，

完整提示词

Use the attached Elias task image as the character, equipment and location reference. Reframe it as his arm-length selfie as instructed; preserve task evidence and the dry or flooded state. Do not copy its external observer viewpoint. Do not reproduce the reference sheet as an opening or ending frame. ELIAS SELFIE CAMERA: One continuous first-person self-recorded mission message, like an astronaut holding a camera at arm length and looking back into its lens. Elias is the person filming, not a third-person cameraman.

Wide-angle helmet-and-torso close-up, gloved forearm at a lower corner; task evidence beside him, doorway over his shoulder.

Restrained natural hand sway only. He may make a small deliberate wrist turn to show the stated task evidence, then return to himself. No cuts, orbit, cinematic tracking, zoom or external reverse shot.

Same reference diving helmet, dark visor, dry suit and harness. Astronaut-like framing only; no spacesuit, outer space or zero gravity.

Preserve the referenced task location and its current dry or flooded state. Do not add people, reveal hidden information, or change the authored action or outcome.

REFERENCE: Attached image is the Elias character design sheet, not the opening composition. Use exactly one helmeted Elias; discard sheet layout, labels, white background and all unhelmeted views.

IDENTITY: Worn yellow diving helmet, opaque dark visor, black diving drysuit, tan harness. Helmet stays sealed; no visible face or body anomaly.

LOCATION: a dry harbor central dispatch room, closed personnel door behind him. Dry floor, breathable air, normal gravity; no underwater particles or bubbles around Elias.

ACTION: He speaks urgently into his helmet camera, listening between sentences. Remain in the present; no flashback. No injury unless explicitly described in ACTION.

SPEECH: Speak this Mandarin message naturally, without omitting or paraphrasing any words: 不过这座基地有不少实验生物，总部说它们对声音十分敏感。主动声纳一通电，

MESSAGE: No subtitles or text generated in the picture; the game displays the exact task and coordinates separately.

No other characters, creature, hidden identity reveal, space setting or cinematic cut.

Preserve the referenced task location and its current dry or flooded state. Do not add people, reveal hidden information, or change the authored action or outcome.

REFERENCE: Attached image is the Elias character design sheet, not the opening composition. Use exactly one helmeted Elias; discard sheet layout, labels, white background and all unhelmeted views.

IDENTITY: Worn yellow diving helmet, opaque dark visor, black diving drysuit, tan harness. Helmet stays sealed; no visible face or body anomaly.

LOCATION: a dry harbor central dispatch room, closed personnel door behind him. Dry floor, breathable air, normal gravity; no underwater particles or bubbles around Elias.

ACTION: He speaks urgently into his helmet camera, listening between sentences. Remain in the present; no flashback. No injury unless explicitly described in ACTION.

SPEECH: Speak this Mandarin message naturally, without omitting or paraphrasing any words: 先拍一张，把那个实验生物的情况留下来，再到分析台上传给总部。

MESSAGE: No subtitles or text generated in the picture; the game displays the exact task and coordinates separately.

No other characters, creature, hidden identity reveal, space setting or cinematic cut.

对白核对　先拍一张，把那个实验生物的情况留下来，再到分析台上传给总部。

完整提示词

Use the attached Elias task image as the character, equipment and location reference. Reframe it as his arm-length selfie as instructed; preserve task evidence and the dry or flooded state. Do not copy its external observer viewpoint. Do not reproduce the reference sheet as an opening or ending frame. ELIAS SELFIE CAMERA: One continuous first-person self-recorded mission message, like an astronaut holding a camera at arm length and looking back into its lens. Elias is the person filming, not a third-person cameraman.

Wide-angle helmet-and-torso close-up, gloved forearm at a lower corner; task evidence beside him, doorway over his shoulder.

Restrained natural hand sway only. He may make a small deliberate wrist turn to show the stated task evidence, then return to himself. No cuts, orbit, cinematic tracking, zoom or external reverse shot.

Same reference diving helmet, dark visor, dry suit and harness. Astronaut-like framing only; no spacesuit, outer space or zero gravity.

Preserve the referenced task location and its current dry or flooded state. Do not add people, reveal hidden information, or change the authored action or outcome.

REFERENCE: Attached image is the Elias character design sheet, not the opening composition. Use exactly one helmeted Elias; discard sheet layout, labels, white background and all unhelmeted views.

IDENTITY: Worn yellow diving helmet, opaque dark visor, black diving drysuit, tan harness. Helmet stays sealed; no visible face or body anomaly.

完整提示词

Use the attached Elias task image as the character, equipment and location reference. Reframe it as his arm-length selfie as instructed; preserve task evidence and the dry or flooded state. Do not copy its external observer viewpoint. Do not reproduce the reference sheet as an opening or ending frame. ELIAS SELFIE CAMERA: One continuous first-person self-recorded mission message, like an astronaut holding a camera at arm length and looking back into its lens. Elias is the person filming, not a third-person cameraman.

Wide-angle helmet-and-torso close-up, gloved forearm at a lower corner; task evidence beside him, doorway over his shoulder.

Restrained natural hand sway only. He may make a small deliberate wrist turn to show the stated task evidence, then return to himself. No cuts, orbit, cinematic tracking, zoom or external reverse shot.

Same reference diving helmet, dark visor, dry suit and harness. Astronaut-like framing only; no spacesuit, outer space or zero gravity.

Preserve the referenced task location and its current dry or flooded state. Do not add people, reveal hidden information, or change the authored action or outcome.

REFERENCE: Attached image is the Elias character design sheet, not the opening composition. Use exactly one helmeted Elias; discard sheet layout, labels, white background and all unhelmeted views.

IDENTITY: Worn yellow diving helmet, opaque dark visor, black diving drysuit, tan harness. Helmet stays sealed; no visible face or body anomaly.

LOCATION: a dry safe personnel passage beside the harbor control room. Dry floor, breathable air, normal gravity; no underwater particles or bubbles around Elias.

ACTION: He speaks urgently into his helmet camera, listening between sentences. Remain in the present; no flashback. Preserve a minor shoulder injury and guarded arm movement; he can walk.

SPEECH: Speak this Mandarin message naturally, without omitting or paraphrasing any words: 深度 1012 米的下潜控制点，再往生活区下潜，目标深度 1040 米。

MESSAGE: No subtitles or text generated in the picture; the game displays the exact task and coordinates separately.

No other characters, creature, hidden identity reveal, space setting or cinematic cut.

对白核对 深度 1012 米的下潜控制点，再往生活区下潜，目标深度 1040 米。

No other characters, creature, hidden identity reveal, space setting or cinematic cut.

对白核对 我们在生活区末端的密码闸门会合。频道留着。

玩家摄影的动态提示词

玩家摄影不是另一组固定人物通讯。最终提示词随实际机位、灯光、遮挡、目标位置与物理状态变化，不能穷举每次玩家截图。下面按当前代码的 5 类结果文案，各给出目标可见与不可见两种离线样例，共 10 份；它们不是新增任务编号。

每份都要上传对应玩家实际摄影位置的环境截图，而不是艾里亚斯角色图。环境参考图有意不含 3D 怪物；只有 MONSTER_SUBJECTS 明确列出的可见目标才可以生成。新开局的人员侧只通过任务自拍视频呈现，所有玩家摄影样例的 HUMAN_SUBJECTS 均为空。

目标可见样例以取景有效且进入剧情摄影为前提，时长 10 秒；不可见样例为普通摄影，时长 5 秒。普通摄影若最近怪物超出 30 米，当前策略不提交生成。取景是否有效仍由游戏判断，模板不能反向证明满足距离、照明和无遮挡条件。

选择结果的代码优先级：已入仓且未隔离，其次人员已到达安全处，其次已隔离，其次已受伤退回，最后仅记录当前位置。不能因希望某个结果成立就选用那段提示词。

隔离结果片必须在实际镜头中同时拍到关闭的闸门与仓内目标。不可见版不构成隔离核验证据。已到达安全处或受伤退回的文字只是已发生的后台事实，不允许玩家摄像机穿墙看到艾里亚斯，也不允许切到干燥房间。

怪物外观

只出现一个港口实验生物：浅灰米色连续肉质皮肤、低矮而细长的身体、有关节的爬行肢体、闭合的嘴。不能替换为鲨鱼、普通鱼、可爱动物或另一物种；不把第一关物种猜测写成章鱼或大王乌贼的定论。

摄影结果清单

前缀	已经成立的结果
P01	当前水域观察
P02	已入货舱未隔离
P03	闸门已关闭
P04	人员已受伤并退回
P05	人员已抵达安全处

当前水域观察 目标可见

动态模板 P01-VISIBLE　示例请求时长 10 秒

没有更高优先级结果时，仅记录当前位置，不预测攻击或救援。

上传实际机位的环境参考图；不要上传角色设定图。目标必须真的在视野中。

完整提示词

Use the attached image as an environment and camera reference, not an exact opening frame. Add only the described generated creatures; preserve the architecture, camera and lighting. Do not reproduce the reference sheet as an opening or ending frame. AUTHORITATIVE SHOT SLOTS. These slots replace all generic fauna and story suggestions. DURATION_SECONDS: 10 LOCATION: Flooded industrial harbor, broken partition bridge and cargo isolation grille. Preserve the current camera image. HUMAN_SUBJECTS: none visible; do not add a person MONSTER_SUBJECTS: Harbor creature, one individual: pale grey-beige continuous fleshy skin, low elongated body, articulated crawling limbs, closed mouth. Generate this creature in the recorded scene; it is intentionally absent from the environment reference image. It is not a shark or fish. CURRENT_RESULT: Record only the present positions; no predicted escape or attack. ENVIRONMENT_ONLY_REFERENCE: The reference deliberately contains no monster model. Preserve the environment, people, camera and occlusion. Generate only the explicitly listed MONSTER_SUBJECTS inside that environment; an empty monster list means add none. The creature must be present naturally, never materialize or fade in. No unseen past action, new injury, rescue, death or door transition. Never substitute sharks, dolphins, cute fish, pets, cartoon animals or generic sea fauna for a specified monster. No smiling faces, friendly mascot styling or new species. No cuts, subtitles or written slot labels. CAMERA LOCK: One continuous stationary shot. Keep camera position, rotation, framing and focal length fixed for the entire clip. No pan, tilt, roll, dolly, tracking, orbit, zoom, reframing, drift, shake, impact jolt or cuts. Static structures stay at the same screen coordinates; only subjects, water and particles move. Never follow a subject leaving the frame. Shot on a battered 1980s analogue hull camera bolted beside a single narrow floodlight, Preserve dark surroundings but expose the subject with readable midtones, visible surface detail and restrained pale highlights. Never crush the subject into black. Low frame rate, subtle interlace and light video grain without obscuring the subject, chromatic smear, blown-out highlights where the beam hits bare steel, condensation creeping across the inside of the lens port, dense marine snow drifting through the beam. Colour is strictly limited to four notes: rust orange as the only warm light, deep abyssal blue-black for every shadow, bone white for highlights, and one single note of warning blood red. Absolutely no green and no teal: no green tint, no cyan, no emerald, no olive, no night-vision look, no green-screen glow, no sea-green water.

连续性和交付核对

两次撞击　V02A 之后的双撞属于游戏中的声音、震动与艇况变化，并非独立的 AI 视频任务。本包不补造两条撞击电影。修艇、开闸、机械臂取箱同样不能因提示词而自动完成。

对白原文　R28 对白按代码逐字保留。V05“这样它就找不到你了”不扩写成绝对安全；V06 要求上传不代表总部已经收到或回复；V02 密码已发给门控，不展示数字密码，不要求玩家输入指定文字。

被动与主动声纳　被动声纳常开，只给远处声源大致方位，不提供距离或障碍。主动声纳要先通电，提供地形和距离，同时持续发声并可能吸引生物。声音方位不是入仓证据。

伤情　V07R 与 V08 INJURED 按 injured 为 true 导出，保留轻微肩伤和受限手臂动作。其他已经受伤后的同 ID 重用也必须保留真实伤情；不借换一段视频自动痊愈。

自拍措辞　代码的通用动作句含 helmet camera，但镜头合同优先：这是能看见艾里亚斯头盔与上身的臂长自拍，不是从头盔朝外看的第一人称视角。

表演细化的现有缺口　R28 多数视频复用同一个简短表演句。本包没有擅自增加怪物露脸、回闪或其他角色；V07R 也未把原代码扩写成按肩包扎动作。需要更细表演时，应作为另行批准的导演版，不冒称现有请求。

剧情边界　人物一直分路，第二关末才会合。第一关不加入尸体搜取摄像仪、三处生物调查、热粘液菌供水或动态密码任务，不暴露尸体身份、死亡责任、袖口或头盔内秘密。

共生背景　本包没有将 Panacea 解释为攻击病毒，不以共生设定为实验生物攻击添加新结论，也不提前揭露后续调查材料。

外部片不是游戏证据　外部生成成功不能自动写入门禁、人物认知、存档或正式媒体证据。素材接入、总时长、连续性和真机效果仍待核验，本次没有修改这些功能。

来源与本地检查

本导出读取当前工作区，不以 Git 已提交版本替代尚未提交的当前实现。任务正文、语音拆分、自拍合同、网络参考图前缀、摄影结果槽位均从现有代码获取，没有调用生成服务。
